Are you interested in autism research?

Southwest Autism Research & Resource Center

"To the world, you may be one person, but to one person, you may be the world."

SARRC is looking for responsible and committed undergraduate research interns to assist with research studies examining our interventions and programs.

Research interns will gain experience in the ethical conduct of applied research, participant recruitment, developmental assessments, study design, and data collection and entry. Interns will also gain familiarity with the current understanding of autism, the diagnostic process, and related treatments.
